REDFLEX Capability Statement

Redflex's commitment and involvement in activities that involve the use of leading technologies, innovative solutions and best practice has seen our customers rewarded with value for money improvements.

As the world's largest Speed and Red Light camera systems outsourcing provider, Redflex is constantly looking at innovation and technology to improve value for money to clients, efficiency, economies of scale and levels of service provided. Redflex's outsourcing contracts rely on Redflex products, hence providing an additional element in product development and performance, such as prosecutability, detection rates, and reliability.

Redflex has employed a culture of innovation throughout the whole organisation and is able to offer this element as a key benefit to our customers worldwide. This in turn has enabled our customers to remain leading edge pioneers in their traffic enforcement programs success whilst making significant impacts on decreasing statistics surrounding traffic accidents and deaths.

Redflex:

- Is the largest supplier and operator of photo enforcement solutions in the USA
- Has the largest installed base of outsourced digital photo enforcement systems in the world
- Processes more traffic infringements through its back offices than any other operator in the USA
- Maintains long term relationships with its customers through quality of service
- Is securing new business in the USA faster than all of its competitors combined.

Specific Redflex services are:

Full Vertical Integration Solutions: Redflex provides customers with the flexibility to create an automated enforcement solution that meets the unique needs and requirements of the contracted agency. Full Vertical Integration Solutions includes:

- In-house manufacturing of each camera unit
- In-house technicians and maintenance teams
- In-house research & development department
- In-house customer service department
- Complete Program: Redflex can provide all of the required infrastructure, support, hardware, software and services to ensure successful operation throughout the lifetime of the photo enforcement program.
