

# REDFLEX IIPS

## Redflex Image and Incident Processing System (IIPS)

**REDFLEX IIPS** is a state-of-the-art ticket processing back-office. REDFLEX IIPS is an "all in one" application with integrated workflows and transparent user features. The web-enabled interface allow users to navigate through various features such as phases of Infringement Management allowing efficient completion of complex business actions.

Automating the full photo enforcement lifecycle, the REDFLEX IIPS system has deployed innovative technology to improve management of the camera operations. All correspondence associated with any ticket is scanned, and automatically attached to the infringement records in the system.

REDFLEX IIPS provides a three-tier scalable architecture to cater for flexible business requirements and large volumes. The processing centre operates as a paperless office, with all information available at the press of a button.

Redflex provides ongoing enhancements to support improved operation and cost minimisation of the REDFLEX IIPS enforcement programs.

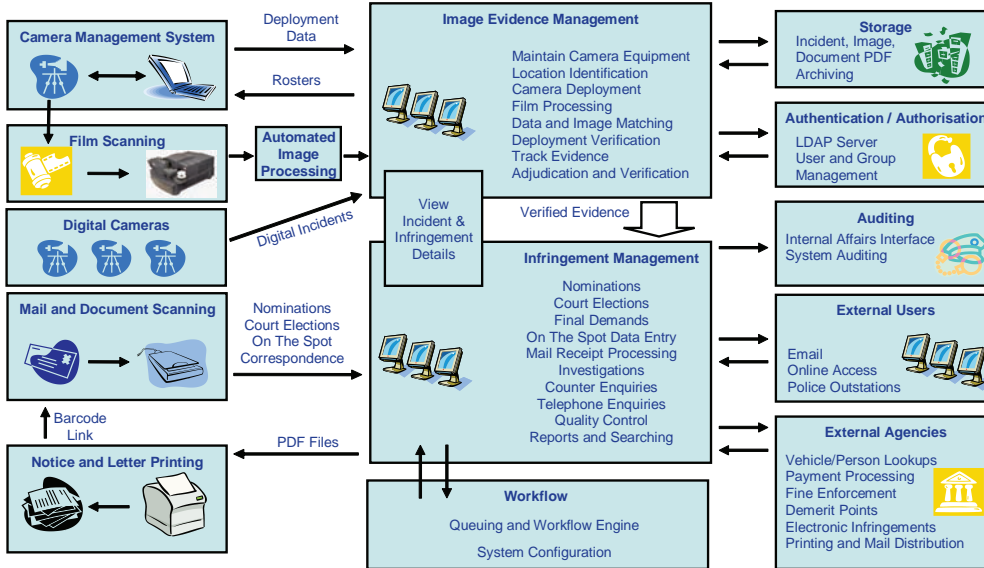

Redflex Traffic Systems Pty. Ltd. is the industry leader in vehicle monitoring and enforcement services for government, police, and traffic departments globally. Redflex has maintained its market leader position by providing customers worldwide with a significant degree of competency, knowledge and subject matter expertise to ensure enforcement program success.

## Data Storage, Security, Effectiveness

Redflex's goal is to provide its customers with the greatest level of data protection and highest level of uptime. All systems are username and password protected. Incident data is digitally signed, and information and remote connectivity are encrypted.

REDFLEX IIPS provides the following security and privacy functionality:

- User login and authentication
- Authorisation of users which controls access to features and data
- Document security levels
- Secure comments
- Audit (i.e. logging and tracking of access)
- Audit-Track interface for use by Internal Affairs (Police).

The REDFLEX IIPS back-office solution provides turnkey solutions for data, violation, court evidence, and violation notice processing. Wireless or hardwired Internet capabilities are provided.
