EDUCATION

avigilon  
THE BEST EVIDENCE™

Avigilon's end-to-end high-definition surveillance solutions enhance the safety of your students, staff and campus property by delivering unprecedented image detail no other system can match. Our components integrate easily with existing systems – including access control and alarm notifications – to boost their current capabilities, allowing for greater coverage and superior detail of student activity. Avigilon will help you prevent incidents and maintain the integrity of your school by providing the best evidence possible.

## We've got your school covered

### ***Keep enrollment high***

Avigilon's high-definition solutions help you maintain a safe learning environment for your students and staff by reducing incidents of campus theft and violence.

### ***Resolve incidents faster***

Avigilon's simple and intuitive interface makes it easy for your security staff to quickly retrieve evidence, speed up response times and resolve incidents faster.

### ***Make budgets go further***

Avigilon systems deliver better coverage with fewer cameras than traditional systems, resulting in lower installation costs and fewer on-campus security personnel. Our campus surveillance solutions will save you money and free up financial resources for other school needs.

### ***Ready, set, go***

Our plug-and-play cameras require minimal training and installation, which means your security team can hit the ground running, and you can stay focused on your students.

## Avigilon Control Center

### ***Easy-to-use software***

Avigilon Control Center (ACC) is powerful and intuitive, with a simple interface requiring minimal training to use. You'll spend less time getting security personnel up to speed, which means they'll be in the field faster.

### ***Open platform***

Avigilon Control Center's open architecture gives you the ability to easily plug in components from your existing system. Connect seamlessly with building management or access control systems for a single point of control and a fully integrated system. Or integrate with mass notification systems to ensure real-time alarm messaging to all members of your security team.

### ***Monitor areas on the go***

Our ACC Mobile application lets security staff connect to your Avigilon network remotely over any wireless connection on their Apple or Android device. Your staff will be able to monitor campus grounds and keep response times down, even when out in the field.

## High-Definition Stream Management™

Delivering high-definition surveillance video can be taxing on bandwidth and storage. That's not the case with Avigilon thanks to our proprietary High-Definition Stream Management (HDSM) technology. HDSM intelligently manages bandwidth and storage, allowing security personnel to find what they're looking for faster, leading to quicker response times, reduced investigation times and superior overall protection.

## Digital encoder

Avigilon's H.264 digital encoder converts a standard analog video feed into a digital stream, providing the most cost-effective way of migrating your existing analog system to a network-based IP system. You'll get the benefits of a digital system without wasting the investment in your current analog arrangement, allowing you to migrate to a fully digital system when you're ready.

## High-definition megapixel cameras

### ***A camera for every scenario***

Avigilon's broad range of megapixel cameras give you the most options to ensure your campus, staff, and students remain safe and secure.

Whether it's a building hallway or an outdoor courtyard, our cameras can provide better coverage in greater detail with fewer cameras than ever before.

#### **HD DOME CAMERAS**

Discreet cameras that provide installation options for both indoor and outdoor settings.

#### **HD PRO CAMERAS**

Up to 29 MP resolution provides incredibly detailed coverage of parking lots, stadiums and other large areas to prevent student violence.

#### **HD PTZ CAMERAS**

Track moving objects and zoom in on facial detail over 900 ft away.

#### **LPR CAPTURE KIT**

Captures license plates with incredible detail in all conditions, 24 hours per day.

#### **HD MICRO DOME CAMERA**

A discreet camera that can be installed in inconspicuous locations, while still providing unparalleled image detail in 1 MP and 2 MP resolutions.

#### **HD FIXED CAMERAS**

Monitor building entrances and exits to minimize instances of unlawful entry.

#### **HD BULLET CAMERAS**

Adaptive IR illumination provides image detail in complete darkness to keep students safe after hours, when resources may be fewer.

#### **HD PANORAMIC DOME CAMERAS**

Get 180° or 360° scene coverage from a single point to cover more area with fewer cameras.

## Telford College of Arts & Technology

### **Challenge**

Provide high-quality, reliable, and accessible coverage of key areas across campus to ensure student safety and security.

### **Results**

- Reduced investigation times
- Maintained outstanding safety grade
- Decreased mischievous behavior

“To make our college viable, we have to attract students. With a state-of-the-art surveillance system, we can reassure students and their parents that we offer an extremely safe environment.”

– Andy Wilkinson, estates manager at Telford College

## Des Moines Area Community College

### **Challenge**

Prevent unlawful activity and boost student and staff safety.

### **Results**

- Increased student and staff safety
- Reduced system costs by 15%
- Ensured campus maintenance

“Avigilon met image quality requirements and reduced system costs by 15 percent. With no recurring licensing fees, Avigilon saves the College \$12,000 annually.”

– Ned Miller, director of Campus Safety and Emergency Management at DMACC
