See everything.

Find out what you've been missing.

In HD.

Avigilon's end-to-end surveillance solutions give you image detail no other system can match.

Our HD Network Video Management Software and mega-pixel cameras deliver superior image quality and maximum coverage. Avigilon components can work together in an end-to-end solution or work with your existing systems to enhance their current capabilities. We offer a variety of configurations that let you customise your own powerful, scalable and cost-effective surveillance solution.

Avigilon can help you protect and monitor an array of diverse locations with the best image clarity, including stadiums, retail environments, critical infrastructure, transportation stations and more providing the best evidence possible.

Our award-winning Avigilon Control Centre (ACC) software with High-Definition Stream Management (HDSM) technology delivers full situation awareness and indisputable image detail, leading to faster response times, reduced investigation times, and superior overall protection. Plus, ACC is just as impressive on an iPad, iPhone or iPod Touch with the ACC Mobile application-perfect for security personnel in the field.

Whether you're looking to enhance your existing system or optimise the experience of your complete Avigilon high-definition surveillance solution, Avigilon offers a variety of accessories and services to complete your system. Get the benefits of Avigilon high-definition surveillance while leveraging existing surveillance systems in the most cost-effective way possible. Avigilon analogue video encoders allow you to integrate your existing analogue cameras into an Avigilon high-definition surveillance system.

Avigilon's high-definition IP cameras come in a variety of formats, including dome, panoramic and fixed and can be used for countless applications. Whether it's a small shop floor that requires a few cameras or a massive complex system requiring complete coverage of numerous areas, you can trust that you're getting the best solution for your security needs. For maximum system performance and efficiency Avigilon cameras are available with either JPEG2000 or H.264 compression. JPEG2000 compression efficiently manages, transmits and displays high-definition images of up to 29 Megapixel. H.264 compression provides high image quality with low bandwidth and minimal storage at high frame rates. H.264 cameras are also ONVIF compatible, allowing for easy and seamless integration with ONVIF compliant products.

Avigilon's end-to-end high-definition surveillance solutions are simply beyond compare. Only Avigilon can provide you with exceptional value and superior image detail that ensures you always get the best evidence.
