### OPTIONS

Software license on a stand-alone PC or sharing with Management System or Fee Computer

Desktop read/write ticket unit with ticket stack feeder

Motorized ticket removing device for multiple ticket production

Swipe reader for the programming of ISO cards

**The Coding Station is a "Back-Office" station that allows administration staff to create batches of encoded tickets and cards such as discount tickets, day/ week passes etc.**
**It is the ideal solution to produce bulk quantities of tickets from stack for shopping center discounts and visitor or congress tickets for business centers, tradeshows, conferences and conventions. The motorized ticket removing device automates the process of multiple ticket production.**
**The Coding Station of the ZEAG product range is PC based on Microsoft Windows software and features password protection based on user and security level.**

### STANDARD FEATURES
